

HERITAGE COUNTS 2017

Heritage and the Economy East of England

The historic environment is intrinsically linked to economic activity, with a large number of economic activities occurring within it, dependent on it or attracted to it. Historic England commissioned Ortus to estimate the national and regional economic impact of the heritage sector using the latest statistical data. The study produces estimates of the heritage sector's impact using a method adapted from DCMS' Creative Industries Economic Estimates and uses the latest statistical releases. Please note that the 2017 Indicators use a revised methodology from 2016 to estimate heritage-related GVA. A full workbook and a technical report can be found on the Heritage Counts website: <https://historicengland.org.uk/research/heritage-counts/>
